Now Even Tougher
On Bacteria.
Still Gentle On Skin.

USER-
FRIENDLY
HYDRATED
LIME

◼ Kilwaughter Lime

38% LESS LABOUR
than other, organic
bedding materials.'

- Independent research

Already using Lime?

A blend of Cubicle Lime and Hydrated Lime is the recommended solution to aid in both the reduction of environmental mastitis and the lowering of the somatic cell count in your milk. **MasterCAL** is the stand-alone ready-blended solution that uniquely balances the bacteria-fighting properties of Hydrated Lime with the usability and comfort of regular Cubicle Lime.

The Ultimate User-friendly Lime solution

Unlike other Hydrated Lime options, **MasterCAL** is friendly to the user, meaning it will be much less likely to cause coughing, choking or skin irritation. And it is also gentler on the teat, meaning both you and your cattle can operate happily in the comfort and protection of a cleaner, dryer cubicle.

The perfect complement to your existing bedding solution

MasterCAL hydrated lime bedding works as a natural accompaniment to your current bedding solution or as a fully sufficient replacement to traditional bedding methods. Its higher absorbancy, increased protection against bacterial infection and positive impact on pH value makes **MasterCAL** the obvious choice for your livestock cubicles.

Keeping your livestock cleaner, drier and better protected

The high calcium limestone powder inhibits the pathogenic bacteria present in livestock cubicles, and can aid in the prevention of environmental mastitis.

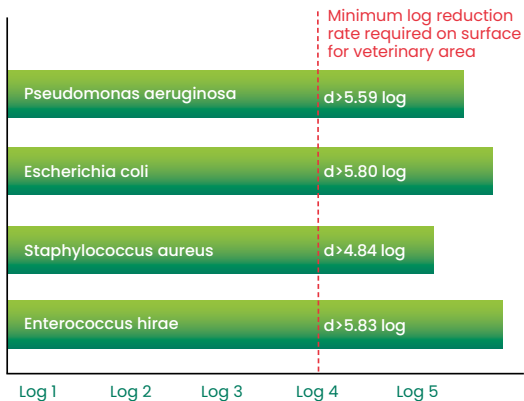

'In a dry winter, we bed with three loads of sawdust. When we added MasterCAL, even in a wet winter, we dropped to two.'

- Dairy Farmer, Ireland

Exceeds veterinary standards for control of Mastitis-Causing Yeast and Bacteria

THE BENEFITS

- Aids in reduction of disease & infection
- Reduces the risk of burns to livestock
- Helps prevent mastitis & reduce SCC
- Highly absorbent
- Labour saving (less stall maintenance)
- Easy on hands & gentle on the teat
